GRANDI LASTRE IN SPESSORE 6 MM . 6 MM THICK EXTRA LARGE SLABS

Caesar raccomanda l'utilizzo a pavimento delle grandi lastre in spessore 6mm per le sole applicazioni in ambito residenziale, commerciale a traffico leggero e comunque in contesti ove non vi sia passaggio di carichi puntuali pesanti o transito di carrelli a ruote dure. La gamma di grandi lastre in 6 mm di spessore è indicata per la posa su pavimenti preesistenti: è possibile effettuare la posa su vecchi pavimenti o rivestimenti in marmo, pietra naturale, ceramica, senza la necessità di demolire la pavimentazione sottostante.

ATTENZIONE: è sconsigliata la posa di queste lastre direttamente sul massetto. Questo perché la posa su massetto è fortemente condizionata dall'esecuzione ottimale del massetto stesso, dalla sua completa stagionatura, dal rispetto degli opportuni giunti di dilatazione nonché dalla posa effettuata a "regola d'arte". Pertanto, in questi casi, Caesar suggerisce l'utilizzo di grès porcellanato in spessore tradizionale.

Caesar recommends the installation of 6 mm thick extra large slabs only in the following conditions: residential environments, commercial environments that are subject to light traffic and in any case in contexts where there is no regular passage of heavy loads or circulation of trolleys with hard wheels. The range of 6 mm thick extra large slabs is suitable for installation on existing floors: the slabs can be installed on old floors or marble, natural stone and ceramic claddings, without the need to demolish the existing underlying floor.

ATTENTION: it is not recommended to install these slabs on a screed directly, since the results of installation strictly relate to the condition - excellent - of the screed, to its seasoning, to the provision of expansion joints, as well as to perfect installation in accordance to "the rules of the trade". In these cases, Caesar recommends the use of porcelain stoneware with a conventional thickness.

Pour le revêtement des sols, Caesar conseille l'utilisation des grandes dalles d'une épaisseur de 6 mm uniquement pour le secteur résidentiel, les zones commerciales à trafic léger et, quoi qu'il en soit, dans des contextes ne prévoyant pas le passage de charges lourdes ponctuelles ou de chariots à roues dures. La gamme de grandes dalles d'une épaisseur de 6 mm est indiquée pour la pose sur des sols préexistants : il est possible d'effectuer la pose sur de vieux sols ou des revêtements en marbre, pierre naturelle, céramique sans devoir pour autant démolir le sol sous-jacent. **ATTENTION :** il est déconseillé de poser ces dalles directement sur la chape. En effet une pose sur chape exécutée dans les « règles de l'art » dépend beaucoup de l'exécution optimale de la chape elle-même, de son séchage complet et du respect du positionnement des joints de dilatation. Dans ces cas, Caesar suggère l'utilisation d'un grès cérame à épaisseur traditionnelle.

Caesar empfiehlt die Verwendung der großen Platten in 6 mm Stärke als Bodenbelag nur für den Wohnungsbau, für nur leicht beanspruchte Gewerbeobjekte und in jedem Fall nur in Bereichen, in denen keine konzentrierten, schweren Lasten vorhanden sind bzw. die nicht von Transportwagen mit Hartgummirädern befahren werden. Die Palette der 6 mm starken, großen Platten eignet sich für die Verlegung über bereits vorhandenen Bodenbelägen: Eine Überverlegung auf bestehenden Bodenbelägen aus Marmor, Naturstein, Keramik ist möglich, ohne den vorhandenen Belag demolieren zu müssen. **ZUR BEACHTUNG:** Von der Verlegung dieser Platten direkt auf den Estrich wird abgeraten. Grund hierfür ist, dass die Verlegung auf Estrich in hohem Maße von der perfekten Ausführung des Estrichs selbst abhängt, von seiner vollständigen Aushärtung, von der korrekten Ausführung der Dehnungsfugen sowie von der „fachgerechten Verlegung“ im Allgemeinen. In diesen Fällen empfiehlt Caesar daher die Verwendung von Feinsteinzeug in traditioneller Stärke.

Caesar рекомендует напольную укладку крупноформатных плит толщиной 6 мм исключительно в жилых и коммерческих объектах с небольшой интенсивностью хождения и в любом случае там, где не предусматривается движение тяжелых сосредоточенных нагрузок или перевозка тележек с жесткими колесами. Ассортимент крупноформатных плит толщиной 6 мм подходит для укладки поверх уже существующих полов. Возможна укладка на старый пол или облицовку из мрамора, натурального камня, керамики, без необходимости разбора уже существующих покрытий. **ВНИМАНИЕ:** не рекомендуется укладка этих плит непосредственно на стяжку. Это вызвано тем, что на укладку на стяжку сильно влияют качественное изготовление стяжки, ее полная выдержка, присутствие всех необходимых расширительных швов, а также безупречное выполнение самой укладки. Поэтому, для такой укладки Caesar рекомендует использовать керамогранит обычной толщины.
